UVV **inspection**

2026/2027

More safety in sewer construction

Schmölz SchachtFIX und Baugeräte GmbH

Lifting accessories, lifting gear and attachments must be inspected regularly, **at least once a year**, by the manufacturer or by a competent person trained by the manufacturer.

Your safety matters to us!

So don't forget to have your Schmölz SchachtFIX lifting devices inspected by us, so that your units can continue to be operated safely in the future.

OUR SERVICES

- **We book the carrier to collect and return your units**
- **Inspection in line with current BG BAU regulations**
- **Documentation with inspection report and inspection sticker**

INSPECTION FEE

SenkkastenFIX	**€10.00**
BeGuFIX	**€20.00**
SchachtFIX Light	**€30.00**
SchachtFIX 1000/1500/SW, **PipeFIX** series, **RohrEindrücker**	**€60.00**
MultiFIX 800/1000	**€95.00**

- Unfortunately we can no longer accept or repair third-party equipment.
- The flat-rate freight charge for each direction is quoted and charged at the current daily rate.
- All prices plus VAT, payable without deduction.

Digital inspection report via QiKY code

After the inspection, you will find the inspection report digitally via the QiKY code on the unit. Simply scan it and the operating manual and data sheet are right there too.

We look forward to your order to inspect your lifting devices.

Please register your units for inspection using the form overleaf by email or fax, or simply by phone.

Ready for collection from (date)

Repairs up to 40% without a cost estimate

If a repair costs up to 40% of the purchase price, we carry it out directly; above that, you receive a cost estimate first. Example for a purchase price of €1,000: €400 repaired directly, €550 after a cost estimate. This gets your units back to you faster.

INFORMATION LETTER

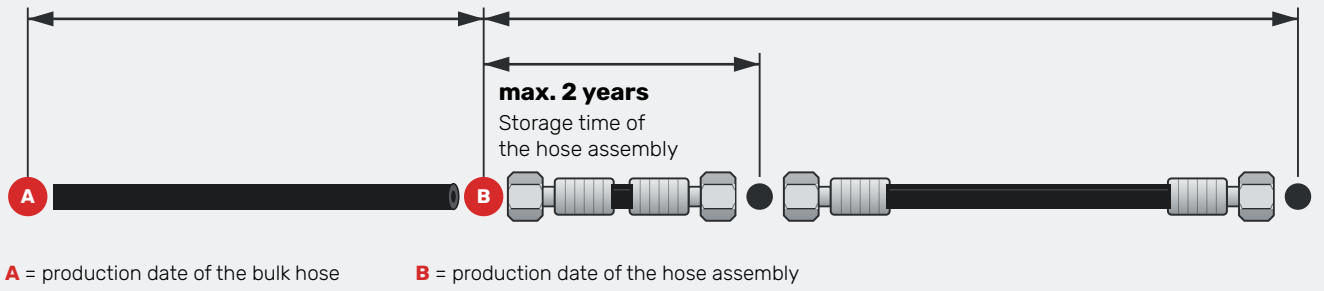
Replacement of **hydraulic hoses**

Schmölz SchachtFIX und Baugeräte GmbH

Dear customer,

we would like to inform you that we, too, are bound by **DGUV Regel 113-020** (German rule for the safe use of hydraulic hose assemblies)! It helps us keep the likelihood of accidents with our hydraulic units as low as possible.

Section 4.5.1 of DGUV Regel 113-020 defines the **service life of hydraulic hose assemblies**. It states that hydraulic hoses may be used for a maximum of 6 years!



A = production date of the bulk hose **B** = production date of the hose assembly

We will check this as part of our UVV inspections and, during the inspection, replace hoses that show damage as well as hoses that have **reached 6 years in use**! We will then mark the new hoses with coloured cable ties. Please do not remove them from the hoses!

This is the only way we can ensure that the units are returned to you reliable and fully ready for use.

We believe it is also in your interest that the hydraulic units your employees use every day return to the site in perfect condition!

Kind regards

The team at Schmölz SchachtFix und Baugeräte GmbH
